THE 9TH DEVELOPMENT CONFERENCE ON ENGINEERING PROGRAMMES IN SWEDEN
22-23 November 2023, Västerås Campus

Development conference on engineering programmes in Sweden is a national conference concerning engineering programmes at university colleges and universities with the purpose of developing the quality of the programmes. By working together we can improve and develop our engineering programmes.

Do you want to contribute to the agenda? There are several ways to do this. Submissions are now being accepted in the form of presentations, work in progress, workshops or roundtable discussions. Read more on the next page.

Registration and additional information:
www.mdu.se/konferens/utvecklingskonferensen-for-sveriges-ingenjorsutbildningar-2023

The conference is designed for anyone who is interested in engineering programmes and will be adapted especially for those who:

- teach or have leadership roles on engineering programmes
- hold administrative or educational development assignments

The objective of the conference is that those who participate will:

- bring something useful to their own practice
- be inspired and contribute to the engineering programmes of the future
- have an opportunity to expand their network

CONFERENCE START AND END TIMES, REGISTRATION AND COST

Start: Wed 22 Nov. 2023 at 11:30

Finish: Thurs 23 Nov. 2023 at 16:00

Please register here
www.mdu.se/konferens/utvecklingskonferensen-for-sveriges-ingenjorsutbildningar-2023

Conference fee:

1900 SEK applies to the first 100 participants who register or up until 31 May. After that **2400** SEK.

(Fees are stated excluding VAT)

SUBMISSION DEADLINES

1 Feb.: Call for papers and submissions opens

4 May: Deadline for submitting your proposals (check the instructions for the presentation formats on the website).

26 May: Deadline for reviewers to comment

16 June: Notification of decision on accepted submissions and feedback from reviewers

16 Oct.: Deadline to submit final text for accepted submissions

22 – 23 Nov.: Conference dates

TOPICS, FORMAT AND CRITERIA FOR CONFERENCE SUBMISSIONS

The theme of the conference is **Sweden's engineering programmes – meeting the challenges of today and the future.** For instance, this may include a submission on:

Types of education, for example:

- Lifelong learning and flexible learning
- Broad participation – flexible learning activities and learning environments
- Digitalisation – hybrid instruction and flexible participation
- Interdisciplinary viewpoints
- Value creation through collaboration and global perspectives
- Learning mode of assessments

Challenges, for example:

- Education in sustainability
- Societal challenges and application in education
- Learning for a digitalised working life

Focus on students, for example:

- Students' learning and skills for the future
- Active student participation
- The student as co-producer of research

The submissions may have the following formats: presentations, work in progress, workshops or roundtable discussions. Information for each type of submission (criteria, length of abstract, etc.) is available on the website.

Submissions will be accepted in Swedish or English. The language of the presentation should be consistent with the written language of the abstract submission and title.
