### Course objective

Based on the doctoral student's thesis work and research communication, the course content and teaching aims to provide in-depth insights into popular science and multimedia research communication as well as to potential collaboration partners both within and outside academia and the challenges associated with this.

### Course content

- Research based on the doctoral student's thesis
- Popular science and multimedia research communication
- Considerations and dilemmas in research communication
- Communication of research to other researchers and partners (local, regional, national and international), the public and to students

### Intended learning outcomes

After completing the course, the doctoral student must be able to

- make different considerations orally and in writing, present and discuss research and research results in dialogue with different target groups

## The intended qualitative targets in the Higher Education Ordinance, appendix 2.

### *Competence and skills*

For a doctoral degree, the doctoral student must show

- B4: the ability in both national and international contexts to present and discuss research and research findings authoritatively in speech and writing and in dialogue with the academic community and society in general,
- B5: the ability to identify the need for further knowledge, and
- B6: the capacity to contribute to social development and support the learning of others both through research and education and in some other qualified professional capacity.

### *Judgement and approach*

For a doctoral degree, the doctoral student must show

- C2: specialised insight into the possibilities and limitations of research, its role in society and the responsibility of the individual for how it is used.

## Teaching formats

Lectures, seminars, workshops

## Examination

INL: Written submission task. Written assignment consisting of a reflective text about the challenges of the own subject 1,5 credits

OBN: Active participation at a seminar where the written assignment must be presented and discussed, 1 credit

## Grade

Examinations included in the course are assessed according to a two-point grading scale with the grades fail or pass (U or G).

Grades must be decided by a teacher specially appointed by the university.

Anyone who has not been approved in the regular exam must be given the opportunity to retake the exam.

## Requirements

To participate in the course and the tests that are included in the course, the applicant must be admitted to graduate level education at Mälardalen University.

### Selection criteria

Doctoral students accepted at other universities within and outside Sweden can be granted access to the course subject to availability, the same applies to teachers with a doctorate at Mälardalen University. Selection of applicants is made in accordance with the ranking below.

1. Admitted doctoral students at Mälardalen University
2. Admitted doctoral students at other universities in Sweden
3. Admitted doctoral students at other universities outside Sweden
4. Teachers holding a doctorate at Mälardalen University
