

STS@MDU

Reading Seminars Series – Autumn 2023

With the goal of creating an STS-Science and Technology Studies group at Mälardalen University and in line with the MDU's mission and vision, this Reading Seminars Series is organised to foster a democratic STS conversation about themes related to the broad areas of Digitalization, Welfare Technology/Health and Care, Sustainability.

Per each seminar, one paper is distributed at least two weeks in advance and an Outlook invitation is sent out to all members of the group. However, the invitation can be forwarded to others who might be interested in joining.

All seminars take place on campus via Zoom and a link is provided in the Outlook invitation.

For joining the STS channel in Teams, contact michela.cozza@mdu.se or silvia.bruzzone@mdu.se or david.redmalm@mdu.se
